- Financial Modeling & Risk Analysis
- KPI Development & Performance Tracking

ADDITIONAL SKILLS

- Content Writing & Research
- Graphic Design (Marketing Materials, Presentations)
- Project Management & Client Relations
- Microsoft Office Suite (Advanced)

PROFILE SUMMARY

I'm a mathematics graduate (Second Class Honours, Upper Division) actively transitioning into data science through intensive training at Moringa School. Skilled in Excel analytics, SQL, and Python, I specialize in transforming complex datasets into clear insights and practical business solutions. Having delivered 10+ client projects-including interactive dashboards, financial models, and business intelligence tools-I combine mathematical precision with data-driven creativity to solve real-world challenges and support smarter decision-making.
